But the consular representa- last named here, first in importance,—it is indistive of her Majesty and and liss no real power for pensable to the safety and progress of the country sposed to be unusually troublesome-by the dread that each of them should be separately touched of possible deportation to the colonies, si et armis, upon. on board of a ship of war. A more satisfactory and trying situation than that of the gentleman filling this post can scarcely be imagined. Before visiting Levaka I had heard Mr. March, the present British Consol, a wood deal snoken of and invarious terms It was pretty clear, however, that with many of the British Levukans he was decidedly unpopular. On attempting to secertain and analyse the causes of this feeling, they seemed traceable to one supposed clusive. Now let it be understood that Mr. March | land. la-by birth, education, and habits,-a gentleman; that his position is, as I have said, a most emburrassing one, withso many responsibilities and such little eal power, that he must very frequently (and un the other, we should quarrel and fight one with crown. The ensigns, which are displayed from avoidably) disappoint persons who seek his official another, and that would be bad for all. You see various small vessels in the harbor, differ only sid; and that he is often brought into contact with many people from whom nothing but a decidedly high tone could enforce respect. Bearing these things in mind, it is easy to understand how the charges of baughtiness and exclusiveness may have arisen, and been spread about, without any foundation in truth or justice. My stay lu Levuka was too towiness too limited to enable me to speak authoritatively upon these points, but it seemed to me that Mr. March was as efficient an officer as the miser ably cramped nature of his powers, and of the means at his disposal, enabled him to be. If the Imperial Government should carry out the scheme which it ing magisterial powers to the Consulate, I have no doubt that Mr. March might very safely be entrusted with such powers. But I must candidly say that I can see no probability of any such scheme being satisfactorily worked out. The representative of but Malesty at Levaka could only be authorized to deal with the cases of British subjects; and there would consequently be many important matters as to which he would have no power of interference Foreign interests might even be interwoven in hostness transactions in order to oust his jurisdiction. Again, the authority to award penalties or decree payment of debts or damages would be very little practical utility unless there was also sufficient power on the spot, to enforce the judgments thus pro-This would require almost as strong a British establishment in the Archipelago as a veritable protectorate. It is true that a recognised and efficient Fillan Government might, under treaty stipulations, carry out the sentences and awards of a British extra-territorial Court; but if the Fijian Government were strong enough to be called upor to undertake this duty, it might very well be left, like other Governments, to deal with these matters in its own Courts. There might us to crimina charges be a statutory power of committal for trial in an Australian Court; but besides that, this would be a dangerous and possibly oppressive power, it would be seldom that a case could be sent on

> The United States Consul, Dr. Brower, has everysody's good word, and his Vice Consul, Mr. Druzy (who now also represents the Swiss Confederation), ems equally popular. The consular officers of the United States have quasi magisterial powers, but I do not think that either of the gentlemen just named are much troubled by their fellow countrymen in occurred between American citizens and the natives. in times past, have been among the most important events of Fijfan history. From the Hawallan Consul, Mr. Murray, the Provisional Government of Fijl received material aid in the shape of complete oples of the Hawaiian Constitution and laws, tran mitted from Honolula. From the same quarter there has also been a direct recognition of King credited Minister. The Consul for the United States has officially recognised the foundation of constitu tional government in Fiji, having issued a proclama tion enjoining all American citizens to respect it.
> The policy of the United States as to Fiji has always been to recognise its native raiers not only as o sovereign rank, but as internationally respon ence. There can be no doubt, therefore, that Il representative. But from none other of the great Powers has there yet been any recognition-formal or informal-of the existing state of things. There he has, I believe, been royally saluted by English, French, and American ships of war, but anyone who has learned the A. B. C of international law knows way blod either of the Powers in question to recognice the Fijlan kingdom, as at present constituted, as one of the great family of nations. It is not improbable, therefore, that some of these Powers, at l events, will wait and see the Fijian Governmen fairly at work and judge for themselves of its stabillity and efficiency ere they so recognise It. Such may be the case with Great Britain, which country has certainly, of all the great Powers, the largest amount of interest at stake in Fiji. It is not likely, however, that the British authorities will throw any impediment in the way of the young Government To do so would not only be unjust but impolitic for in the course that has been taken the Filiar rulers have only done what the British Government has frequently, by its representatives, counselled them to do, although the modus eperundi may not have been such as was expected. It will obviously be for more advantageous to British interests that Fill should have a Government of its own by which those nterests will be likely to be looked upon, than that It should fall under the dominion or influence of any other great maritime power. The fact of Mr. March. the British Consul, having in no way recognized the Provisional Government has given rise to a great deal of discussion and speculation in Fiji. But the truto is he could not recognize it under any circum stance without instructions from the Imperial Government to that effect; and unless there is a very musual departure from official routine it is not very likely that any such instructions will be given until after whatever communications may have been sent to London by the Provisional Government shall have been reported to the British Consul. Mr. March recently handed over the management of postal matters to two principal merchants of Levuka, and as these gentlemen happen also to be members of King Thakomban's Cabinet, it was believed by many that the British Consul had by this act officially recognized that Cabinet. But such was not the case. This transfer of postal affairs had been accommanied by an express declaration that it was only made to the gentlemen in question as Merchants, not as Ministers. The Fijian Government is about to issue postage stamps: but having as yet no postal arrangements with any other country, such stamps will be only available at the outset for inter-island mails. One

of the first things done by the Provisional Governtoo-was to dispatch a special envoy per mail steamer. Where he was to go, and what were his duties and instructions, were of course "State secrets; but if it be assumed that his mission was to try and secure official recognition from some of the Powers whose friendship was considered essential to the existence and well being of the new kingdom, I dare hope that such mission will be successful. There are many and really serious difficulties with which the Fillan Government will have to grapple at the outset; but which, by good ludgment and firmness, combined with moderation, may (and I believe will) be overcome. There are, I believe, some fundamental errors which will have to be corrected ere the national machinery will run safely and smoothly, but which, if those who are at the head of affairs act wisely, will be gradually and naturally cleared away as time goes on.
